

PRIY MAVANI

priy.mavani.cg@gmail.com | +91 7861862163 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#) | [YouTube](#)

SKILLS

Languages: Java, C++, JavaScript

Frontend: React.js, Next.js, Material UI, Chakra UI, Tailwind CSS

Backend: Node.js, Spring Boot, Express.js, REST APIs, JWT Authentication, RBAC

Databases: PostgreSQL, MongoDB, Supabase, Prisma ORM

Cloud & Tools: AWS, Docker, Postman, Vercel, Render, Netlify, Figma

Core CS: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

StockMaster | [GitHub](#) | [Live](#) | [Demo](#)

Tech Stack: React, Node.js, Express.js, MongoDB, TanStack Query, Tailwind CSS, JWT

- Enterprise inventory management platform for multi-warehouse stock tracking, inventory movements, audit logging, and operational **analytics**.
- **Engineered** inventory workflows using **MongoDB ACID transactions**, ensuring consistency across stock updates, movement histories, and audit records.
- **Optimized** backend **performance** by eliminating N+1 queries, parallelizing aggregations, and leveraging TanStack Query caching to reduce database and network overhead.

CraftQR (Smart QR Platform) | [GitHub](#) | [Live](#)

Tech Stack: Java 21, Spring Boot, PostgreSQL, Next.js, TypeScript, Spring Security, AWS S3, JWT

- SaaS platform for creating, managing, and tracking static and dynamic QR codes with secure file management and **real-time** scan **analytics**.
- **Architected** a modular monolith using **Spring Boot**, integrating S3-compatible object storage with custom reference validation for secure file lifecycle management.
- **Designed** a **scalable analytics** engine using **PostgreSQL** and SHA-256 anonymization to generate privacy-compliant scan insights while strengthening application security.

BookEase | [GitHub](#) | [Live](#) | [Docs](#)

Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Multi-role appointment scheduling platform with intelligent slot management, booking automation, and **real-time** availability tracking.
- **Implemented** **concurrency**-safe reservation workflows using **MongoDB transactions** and slot-locking mechanisms to prevent overbooking during simultaneous bookings.
- **Optimized** database **performance** through compound indexes, partial unique constraints, and aggregation pipelines for booking **analytics** and provider utilization.

Task Bridge | [GitHub](#) | [Live](#)

Tech Stack: React, Node.js, Express.js, MongoDB, Socket.io, Cloudinary, JWT

- Collaborative project management platform integrating task tracking, team messaging, video conferencing, and shared workspaces.
- **Built** a **Socket.io**-powered **real-time** collaboration engine enabling live Kanban synchronization, instant messaging, notifications, and user presence tracking.
- **Integrated** Jitsi Meet, Cloudinary-based document management, scheduled reminders, and collaborative whiteboard features for distributed team collaboration.

ACHIEVEMENTS

- **Azure AI Code Extension Hackathon Winner** — Built an AI-powered developer assistant that automated context-aware code generation. [GitHub](#)
- **Google Student Ambassador (2026)** — Led AI workshops, technical sessions, and campus events promoting Google technologies.
- **ESoCS Open Source Contributor** — Delivered production-ready contributions and collaborated with maintainers using standard Git workflows. [Profile](#)

EDUCATION

Rai University | Bachelor of Technology in Computer Science and Engineering | Aug 2024 – Jun 2028 | CGPA: **9.5/10**
